

PRINCESS PEACH VOM PROCTOR HOUSE

Designer Gorilla Bloodline | Mother of the Cinema Litter

Princess Peach Vom Proctor House is a homebred female who represents the continued development of the Proctor House Rottweilers breeding program. With Proctor House genetics on her sire's side and respected European bloodlines throughout her pedigree, Peach brings together power, substance, structure, breed type, and generations of carefully selected genetics.

Born February 22, 2024, Peach is the daughter of Hulk Vom Proctor House × Dzesi Vom Tannenfeld. As a daughter of Hulk, she carries forward one of the cornerstone males behind our program while adding the influence of Dzesi's Serbian pedigree.

Her pedigree features respected dogs including Hannibal Rotco-Roler, Marshall Rotco-Roler, Diablo Timit-Tor, Hulk Crni Vitez, Eminem Vom Hause Edelstein, Doctor Timit-Tor, Lucifer Timit-Tor, Lex Vom Hause Edelstein, and Mia Vom Haus Maresi.

Bred & Raised at Proctor House

Being homebred makes Peach especially important to us. She represents a generation of Proctor House genetics that we were able to produce, evaluate, raise, and ultimately incorporate back into our own breeding program.

Peach possesses many of the characteristics we want our females to carry forward: strong Rottweiler type, substance, impressive structure, a powerful headpiece, beautiful expression, and confident presence.

She represents exactly what our Designer Gorilla Bloodline is about—building generation after generation rather than simply producing individual litters.

Mother of the Cinema Litter

Princess Peach has already earned an important place in our program as the mother of our Cinema Litter.

The Cinema Litter represents another chapter in the evolution of Proctor House Rottweilers, combining Peach's homegrown Proctor House foundation with carefully selected genetics to continue moving our program forward.

For us, every generation has a purpose. Peach going from a puppy produced here at Proctor House to becoming a mother within our breeding program is exactly what building a true bloodline is all about.
